

Bharath K S

UX / Product Designer

A multidisciplinary Product Designer with **12+ years** designing digital experiences that are intuitive, functional, and built to scale. At **Flipkart**, redesigned core product features and led design on new, high-impact launches. Has carried that same ownership into startups, helping build design functions and products from scratch, increasingly with AI built into the process to sharpen decisions and execute stronger work.

// EXPERIENCE

• UX/PRODUCT DESIGNER (INDEPENDENT / CONSULTING)

2021 – Present

- Partnered with a visual designer to redesign the shopping experience for **Virgio**, a sustainable fashion app, while guiding a team of 2 designers. The improved usability reduced journey drop-offs and lifted engagement, interaction, and conversion.
- Designed digital products from the ground up for early-stage clients, taking each from concept to a build-ready product.
- Currently building a story-development tool for writers, turning scattered ideas into a clear, structured plan to help them go from first idea to finished script.

• UX/PRODUCT DESIGNER II, **FLIPKART**

2014 – 2021

- Redesigned core end-to-end experiences across web and app, including Ratings & Reviews, Q&A, Product Page, and Home Page widgets.
- Contributed as a core team member across multiple design responsibilities for Big Billion Days, India's flagship shopping event.
- Pioneered Cardless Credit and Flipkart Lite from the ground up; Flipkart Lite, built in collaboration with Google, became India's first progressive web app and drew global recognition.
- Designed a simplified Flipkart experience for India's next 100M users, reimagining the app for a mass-market audience.
- Designed FK Videos, an experimental in-app streaming feature built to boost customer retention and engagement.
- Grounded design decisions in first-hand user research and usability testing, and partnered closely with PMs, marketing, business, and engineering, from concept through launch and beyond, to ensure smooth execution.

• UI/UX DESIGNER, **COMMONFLOOR**

2013 – 2014

- Designed core features of CommonFloor's real-estate platform under the guidance of the lead designer, contributing across several major projects.
- Built a design framework and specifications for ad creation that sharply improved ad visibility and engagement, driving a significant lift in ad revenue.
- That impact led to being entrusted with 2 designers to guide on day-to-day ad design, while continuing to handle core UX design work in parallel.
